

## OTAP Software License Policy and Information

At the Center for Innovative OT Solutions, we continually strive to provide occupational therapists with the most up-to-date assessment tools. An AMPS license key for OTAP software is available for 3 year, 2 year, and 1 year durations and gives the occupational therapist access to the AMPS in the OTAP software for as many years as his/her license key is valid. Then the occupational therapist will need to renew his/her license key for that assessment. Evaluation of Social Interaction license keys and the School Version of the AMPS license keys are available by participating in ESI and School AMPS courses respectively. In the time period of a valid license key, occupational therapists will receive every OTAP software update and improvement at no charge. This will enable each user to stay as up to date as possible with the assessment tools.

We encourage each occupational therapist to renew his/her AMPS license key on schedule so that he or she is always able to access the software. The occupational therapist who lets an AMPS license key expire may be required to revalidate or recalibrate (take a new course) before he/she is allowed to receive a current AMPS license key.

As with any assessment tool, the Center for Innovative OT Solutions considers it the occupational therapist's personal and professional responsibility to remain informed of manual and software updates. The best way to stay apprised of updates is through our website, [www.innovativeOTSolutions.com](http://www.innovativeOTSolutions.com).

The expiration date for an AMPS license key is listed in the e-mail you received with your license key. In case you do not have access to that message, there are two ways to find your expiration date:

1. In the OTAP software, ***Help / License***
2. Visit [www.innovativeOTSolutions.com](http://www.innovativeOTSolutions.com) and log into CORE with your e-mail address and the CORE password you created when you took your course. Click Retrieve AMPS Software Codes to see your license key and the date of expiration.
