

## OUR GIFT TO YOU

Become an ACQ-OP or ACQ-SI rater at no extra cost!

# Innovative & Revolutionary

ACQ-OP and ACQ-SI — Partner Tools for the AMPS and ESI —  
simple, quick to learn, 5-10 minute interviews

Learn about a *person's perspectives* on his/her performance  
**and, at the same time,**

Evaluate the *extent of difference* between a person's reported problems with  
occupational performance and those observed by the occupational therapist  
when administering the AMPS or ESI

### The ACQ-OP/ACQ-SI

- Promotes developing client-centered goals, planning and implementing interventions, and/or making recommendations for needed supports or assistance
- Is easy to learn and quick to administer
- Is fully standardized using many-facet Rasch measurement methods

Learn to use the ACQ-OP or ACQ-SI through self-study. Read the ACQ-OP/ACQ-SI manual and administer it during AMPS/ESI calibration!

For a limited time\*, CIOTS is offering AMPS and ESI course participants a free 3 year license key for the ACQ-OP/ACQ-SI and the opportunity to calibrate. Course participants will

- Self-study using the free and downloadable ACQ manual
- Calibrate simultaneously with the AMPS and the ACQ-OP or the ESI and the ACQ-SI

\* Offer ends 31 August 2015

### What is the ACQ-OP/ACQ-SI?

The ACQ-OP/ACQ-SI is a standardized, **5–10 minute interview** that enables you to evaluate the extent of the discrepancy between a person's

- **Reported problems** with ADL task performance/social interaction and
- **Observed problems** that you scored on the AMPS/ESI

### How do I administer the ACQ-OP/ACQ-SI?

- Observe the person according to criteria in the AMPS/ESI manual
- Interview the person immediately after each ADL task performance/social exchange to learn the person's perspectives based on his or her answers to 13 ACQ-OP/ACQ-SI questions
- Score the AMPS/ESI
- Score the ACQ-OP/ACQ-SI by comparing the extent of the discrepancy between what the person said during each interview with what you scored after the AMPS/ESI observation

### How do I learn to administer the ACQ-OP/ACQ-SI?

- Download the ACQ-OP/ACQ-SI self-study materials from the CIOTS website, [www.innovativeOTsolutions.com](http://www.innovativeOTsolutions.com)
  - ACQ-OP/ACQ-SI manual
  - ACQ-OP/ACQ-SI Interview Guide
  - ACQ-OP/ACQ-SI Score Form
- Read the ACQ-OP/ACQ-SI manual
- Interview each person that you observe for your AMPS/ESI rater calibration
- Submit your rater calibration data together for the AMPS and ACQ-OP or the ESI and ACQ-SI

### Why should I use the ACQ-OP/ACQ-SI?

- Base your evaluation on **specific ADL task performances/social exchanges** the person just performed, not just his/her report of daily life tasks in general
- Identify people who may be at risk
- In conjunction with the AMPS/ESI, identify the types of supports a person needs
- Use the OT Assessment Package (OTAP software) to
  - Calculate linear ACQ-OP/ACQ-SI discrepancy measures
  - Generate *ACQ-OP/ACQ-SI Results Reports*
- For more information, visit our website: [www.innovativeOTsolutions.com](http://www.innovativeOTsolutions.com)

**Assessment of Compared Qualities —  
Occupational Performance (ACQ-OP)**

**Assessment of Compared Qualities —  
Social Interaction (ACQ-SI)**

**— Calibrate in both at the same time —  
AMPS and ACQ-OP or ESI and ACQ-SI**
